

One of the great things about the window film business is the number of different problems solved through the application of our 3M high performance window films.

**New York, NY:** 3M Scotchcal Film recently was installed by Window Film Depot in an office building on Wall Street covering 900 square feet of office glass in a pattern chosen by the client to preserve the natural light coming into the office, but provide the privacy required to conduct business without interruption.

**Boston, MA:** Window Film Depot designs, creates and installs printed graphical film on 700 square feet of storefront in downtown Boston. The film has printed images of menu items from the new high end Italian eatery and will act as a billboard for the new restaurant as it prepares for it's opening in September.

**Atlanta, GA:** Window Film Depot recently installed 1,500 square feet of 3M Affinity 15 solar film on the western exposure of a building suffering from unbearable heat gain & glare through single paned glass. Workers were amazed at the advanced performance of our 3M film...and they went back to work in a more comfortable environment.

BE COOL  
SEE THE LIGHT

**Ft Lauderdale, FL:** Window Film Depot installed 3M NV25 Scotchshield Security Film with IPA attachment system to provide both visual and force protection security for a new office space. Not only will the film provide the client daytime privacy, but the multi-layered Scotchshield technology from 3M will help prevent 'smash and grab' crime.

**Burlington, VT:** WFD installed 3M Fasara decorative film for a design-build client in need of glass protection. 1,400 4" 'frosted' squares were installed on 1,200 linear feet of interior wall glass helping people to avoid from walking into the glass.

**Davenport, IA.;** Window Film Depot installed 3M Scotchshield Security Film on windows for a major chemical company to help control glass failure if an industrial explosion occurs. The application will help lower insurance rates at the company and was recommended by the insurance company as a measure that was low investment / high return.

**Seattle, WA:** Office Depot's expansion includes renovating Circuit City stores and Window Film Depot provides the national account servicing to help make this happen. Window Film Depot removed over 1000 sq. ft of existing solar film, replaced glass that was damaged, applied solar and decorative film and logos – all within 24 hours of receiving the call to 'get it done.'

**Window Film Depot** provides national installation services for window films for commercial clients. Our ability to solve problems for clients with our installed film solutions is truly unique. We have installation offices in major cities across the US and provide reach & experience unmatched in the window film industry.

**Window Film Depot Engineered Solutions** provides assessment, building energy savings analysis and wholesale turn-key installation services as a primary contractor or subcontractor to firms working within existing buildings on energy reduction programs. 3M Window Films are a qualified retro-fit energy efficiency upgrade product that can help property owners realize substantial tax incentives as stipulated

in the EPA Act of 2005. Together with mechanical upgrades, lighting and other carbon reducing improvements, real dollar energy savings of up 40-60% are achievable and are rewarded with tax deductions equal to up to \$1.80 per square foot of building space.

**We are experienced professionals** since 1992; Window Film Depot has earned the reputation as the leading installing dealer of solar, security, decorative and specialty films. In 2006 and again in 2008, we were named a "3M Dealer of the Year" based on our stellar customer satisfaction reviews and overall business performance.

**Working Together:** Window Film Depot services include building modeling, product sampling, and project management & installation services. We utilize Department of Energy software to quantify energy savings for clients and install 'proof of technology' samples. Our installation services are available throughout the US and our installers and PM's are 3M trained and certified.

For a no-nonsense approach with delivery and reliability that is uncommon in any service industry, call 1-866-933-3456 to discuss solving your 'glass problems' creatively, efficiently and above expectations.
